The University of Amsterdam offers an excellent summer school programme called 'Planning a Cycling City'. It takes an 'auto-ethnographic' approach to learning about mobility which helps participants gain a deeper, and more diverse understanding of cycling in Amsterdam and the relationship between mobility and the built environment.

Thanks to a study grant from Engineering NZ's Transportation Group, Claire Pascoe attended last year and was determined not to bring home a series of enviable cycling infrastructure photos that simply resulted in the commonly heard cry, "But we're not Amsterdam!" Indeed, we're not, but through an experiential and reflective learning opportunity, there were still some gems to bring home.

Claire will present some key learnings from the course, and how these have evolved after 8 months of further reflection back in New Zealand. One of her first tasks when she got home in July was changing her job description from Lead Advisor Multi Modal, to Lead Advisor Urban Mobility. Why?

**Q&A****We look forward to having a discussion with Claire**

**Claire Pascoe** is the Lead Advisor Urban Mobility at the New Zealand Transport Agency.

In her current role, she provides technical expertise and leadership in relation to rebalancing the transport system, providing people with genuine options for getting around our towns and cities and making them healthier places to be.

Claire was previously involved in developing and delivering the Urban Cycleways Programme and managing the national cycling culture change team.
